

## iBank

Reporting

### What is iBank Reporting

iBank Reporting delivers over 120 standard reports and a virtually unlimited number of user defined reports upon demand or on a scheduled broadcast basis. With iBank reporting you can focus on Spend Analysis, Supplier Management, Policy/Risk Management, Activity Management, Spend Management, Reconciliation Analysis and Agency Productivity. NEW in 2009 is iBank's Carbon Reporting. This new feature gives you access to CO2 emissions calculations based upon trip details.

### Why Use iBank Reporting?

Managing travel programs is a complex process that includes everything from ensuring a pleasant and safe experience for the traveler to managing one of the largest items on financial statements. These tasks are made more difficult by having to manage unique requirements associated with international travel.

### iBank Reporting Delivers

Regardless of how many data sources you have, iBank Reporting provides you with a global view of travel spend by enabling you to capture and bring together all of the information from all trips taken and planned, throughout the world. This information is available for on-demand reporting and may be exported for use in other applications (e.g., expense reporting and business intelligence). By capturing, consolidating and storing travel information in your own iBank data warehouse, you can help your customers manage their travel budgets by monitoring policy and contracts, reconciling travel spending and analyzing results.

### With iBank Reporting You Can:

- Capture, standardize and warehouse travel information from multiple sources for a single, consolidated view of all travel expenditures incurred worldwide.
- Run more than 120 standard reports and create an unlimited number of custom reports that provide you and your customers with up-to-the-minute travel spending details.
- Identify the location of any traveler at any given time.
- Aggressively manage vendor and supplier contracts.
- Easily comply with travel and procurement policies.
- Schedule the production and email delivery of reports, and grant direct system access to those who need the information (e.g., meeting planners, department heads and security personnel).

"With iBank we have reduced the time spent on client reporting preparation by over 90%. As an owner, the benefit I enjoy the most is the ability to have up-to-the-minute data about all client, vendor and company-wide activity at my fingertips. iBank is an indispensable tool for the strategic management of our company."- A & I Travel
