

TravelOptix® Spend Analysis App™

We help companies of all sizes unlock their business potential by automating complex and routine aspects of their business while dramatically enhancing the way they acquire and process travel information.

The Spend Analysis App enables you to have quick access to analysis and visualizations, ensuring that you know where every dollar of spend is going. The Spend Analysis App consumes iBank® data with booking information from all of your GDS providers.

Armed with information about your bookings, you can take actions necessary for your business, from negotiating rates at new hotels that travelers are booking to identifying new popular air routes.

BENEFITS OF SPEND ANALYSIS

Quick access to data analysis

Insight into where money is being spent

Make data driven, intelligent business decisions

STANDARD FEATURES INCLUDE

2+

Years of back office data

300

Raw dimensions from iBank

150

Measures like sum, average, min, and max

75

Visualizations like KPIs, bar charts, tables, and line graphs

19

Sheets of collected visualizations

The Air Top Markets visualization provides real-time data regarding the most booked city pairs and destinations. We provide the data using the true origin and destination, ensuring you have accurate information on the trips travelers are booking.

Additionally we highlighted the most booked carriers for those routes enabling you to monitor spend on a particular carrier.

The Hotel Suppliers visualizations provide insight into multiple dimensions of your hotel bookings, from total spend by chain to total spend by property.

A scatter plot diagram lets you quickly identify any outliers and drive any necessary actions according to your business goals and program.
